

G T T G C C A T G G C A A C C G

The image displays a sequence of nucleotide bases: G, T, T, G, C, C, A, T, G, G, C, A, A, C, C, G. Each base is rendered in a large, bold, sans-serif font and is color-coded: G is yellow, T is red, C is blue, and A is green. Below the main sequence, a second layer of smaller letters is visible, which appears to be a reverse or complementary sequence. For example, under the first 'G' is a 'C', under the first 'T' is a 'C', and under the first 'A' is a 'T'. This secondary layer is also color-coded to match the base it represents. The entire sequence is set against a white background.
